

Hoboken Pie Google Monthly Reporting

The Big Picture

In March, we invested \$709.81 in Ads which generated **28 Direct Catering Leads**. This represents approximately **\$7000.00 in potential revenue** if catering orders are **\$250**. Essentially we are acquiring high-quality catering inquiries for just **\$25.35 each**.

Why It's Working

- 1. Strong Brand Trust:** Ads specifically mentioning "Hoboken Pie" are performing exceptionally well, with a **22% Click-Through Rate**.
- 2. Mobile First Customers:** The vast majority of your leads (**24 out of 28**) are coming from people searching on their **Mobile Phones**.
- 3. High Intent:** Traffic is going directly to your **Catering Menu**, which is currently your most active landing page.

Growth Opportunity

We currently have **76% visibility** in the Austin catering market. However, we are missing out on **16% of potential customers** because our daily budget is being reached before the day ends. If the kitchen has the capacity for more orders, a small increase in the daily budget would allow us to capture those extra leads.

Friday is Your "Gold Mine": Friday is your strongest day for leads, bringing in **7 conversions**, more than double the volume of your slowest days. We should ensure your budget is highest on Friday mornings to make sure we don't miss a single weekend party or office lunch inquiry.

High-Intent "Non-Brand" Wins: While most leads are brand-specific, we successfully captured **2 conversions** from people searching for "pizza party catering". Even though these are more expensive to get, they represent brand-new customers who didn't know about Hoboken Pie before, making them high-value for long-term growth.
